Complete Solutions for Liquid Filtration

Rotor Blade Self Cleaning Filter Model S4

The Rotor Blade self cleaning filter allows cleaning of the filter screen without operator contact and without disruption to the liquid flow using a unique 'screw down' mechanism that drives debris toward the sump of the filter. It is suitable for all liquids particularly those of high viscosity such as chocolate or generally those of high value, as liquid losses from the system are minimal.

Main Features

- Continuous Filtration - No interruption to flow during cleaning process
- Fully automated or manual operation.
- Filtration level down to 25 micron
- Stainless steel 316 construction.
- Simple maintenance. No uncoupling of motor or dump valve to gain access to the screen.
- Unique screw down cleaning action driving debris toward the sump of the filter.
- No build up of debris within the filter mechanism.
- Perforated or slotted screen with stainless steel or plastic blades.
- Minimal losses from system. Maximum pressure 13.8 barg at 50 deg°C.
- Maximum temperature 260°C dependant on seal material.

Applications

- Adhesives
- Chemicals
- Chocolate
- Inks
- Lacquers
- Paints, stains and varnishes

Please note

1 Working pressure is stated at 50°C. To verify suitability of this equipment above this temperature or below 0°C, please contact our Technical Sales Team.

2 Whilst alternative seal materials e.g. EP, PTFE are available and can be used to offer a wide range of chemical compatibility and working temperatures up to 260°C, it is recommended that such applications are again discussed with our Technical Sales Team.
