## History

Located in Hillsboro, Oregon, M. L. Gatewood Company has been manufacturing Needle Jet trim nozzles since 1962, for use on paper machines around the world.

Based on our customer requirements, we have expanded our line to include edge-trimming machines and nozzles for other applications on the machine. Looking to continuously improve, we are always searching for ways to better serve our Customer.

## Quality

We understand how important the quality of our nozzles are to successful paper machine operations. Our nozzles are rigorously inspected and spray tested to ensure they meet specification. We guarantee that our nozzles work!

We are always striving to provide the best technology in our designs. Research and development is an on-going process at Gatewood.

## Service

Gatewood provides attention to individual customer needs. We stand behind our products to the complete satisfaction of our customers. No strings, no questions, just a commitment to service.

- Large Inventory
- Practical Packaging and Labeling
- No Question Too Small
- Technical Assistance means you're only a phone call away from Gatewood's knowledgeable staff.
- Same Day Shipping on all In-Stock Parts to keep your machines running

Ruby trim Nozzles are available in Single, Double 10° and Parallel Stream. We have completed a comprehensive development program to perfect these nozzle designs and extensive testing has been done to ensure a very effective and high quality product for our customers. Our Ruby nozzles have Stainless Steel bodies and low friction precision ruby orifices and are provided with a rotating Teflon shield or integral Stainless Steel Shield to protect the stream from moisture or debris buildup. The shields are cut on an angle to direct drips to the waste side of the cut. Orifices are available in a large range of sizes. Our Double Stream nozzle can be requested with two different orifice sizes.

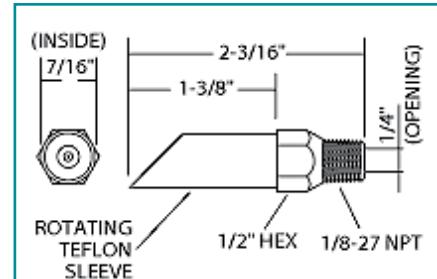

See Page 9 for special Gatewood Thread Adapters and Page 7 for Stream Details.

## Ruby Tips - Single Stream

### Single Ruby Tip in Stainless Steel Shell with Teflon® Drip Shield

| .025" | RA-PRL259MSS | RA-PRL259SS      |
| .030" | RA-PRL309MSS | RA-PRL309SS      |

Note: Also available with anti-stick Teflon® Coating.  
Add TEF to the Part # - i.e. RA-PRL109MSSTEF

# ***Stainless Steel Tips***

***Leaders in Spray Nozzles for the Paper Industry***

Stainless Steel Tips are available in Single, Double 10°, and Parallel Streams. Single Stream tips produce a fine, tight stream that can be used in a great range of distances from the web. They come in regular or high-pressure shells. Orifice sizes range from .010" through .080" and threads are 1/8" NPT.

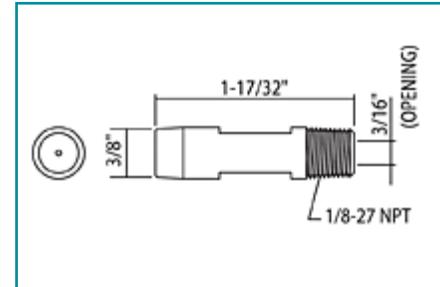

See Page 9 for special Gatewood Thread Adapters.

## Pyrex Tips

### Pyrex Tip in Brass Long Shell

Gatewood's most widely used nozzle comes equipped with a reliable Pyrex tip. This guarantees a smooth, consistent flow. Orifice sizes range from .010 through .080 and threads are 1/8" NPT. See Page 9 for Gatewood Thread Adapters

| Size  | Part # |

## Ceramic Tips

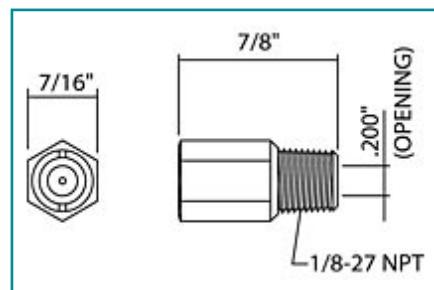

The Gatewood Ceratip is a long lasting, precision, high pressure nozzle with an extremely hard ceramic tip. This tough, high quality nozzle was specially designed by Gatewood at the request of several large paper mills in need of a nozzle to withstand high pressure while maintaining the highest quality stream over long periods of time. Orifice sizes are .010", .015", .020", .025", .030", .035", .040" and .050" and threads are 1/8" NPT.

# Edge Trimming Machines

Leaders in Spray Nozzles for the Paper Industry

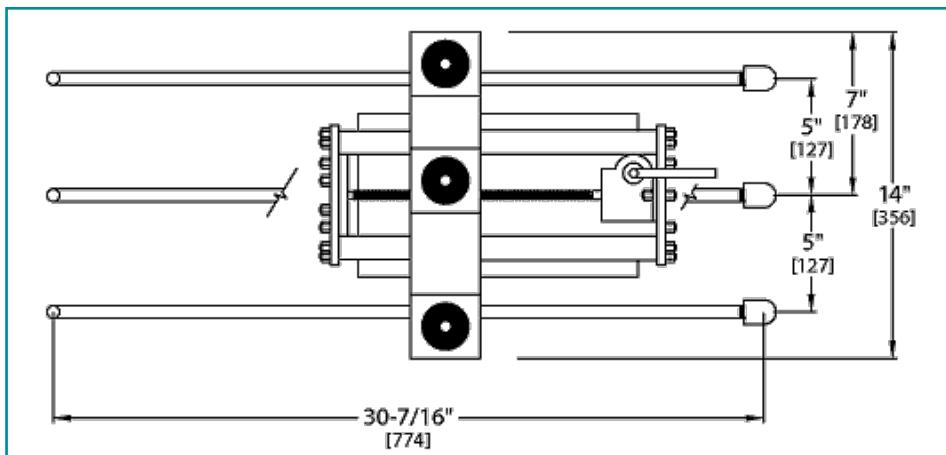

The world's leading wet-end trim nozzle manufacturer can now provide you with a complete edge trimming system. Our unique machine allows the operator to make precision adjustments to the width of the sheet or safely change a nozzle during production.

## Adjusta Trim Squirt

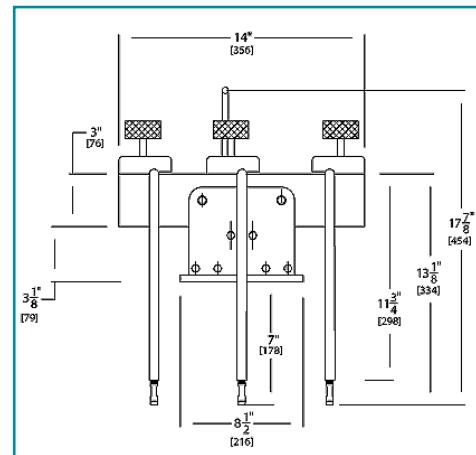

- Precise horizontal adjustment through an 8-1/4" range.
- 1/2" diameter squirt pipes accept 1/8" NPT trim nozzles directly into the outlet end.
- Easy filter screening access at the inline end.
- Rugged machine
- Easy to install and operate
- Maximum adjustability within a compact size
- **SQUIRT PIPES FABRICATED TO YOUR SPECIFIC REQUIREMENTS**

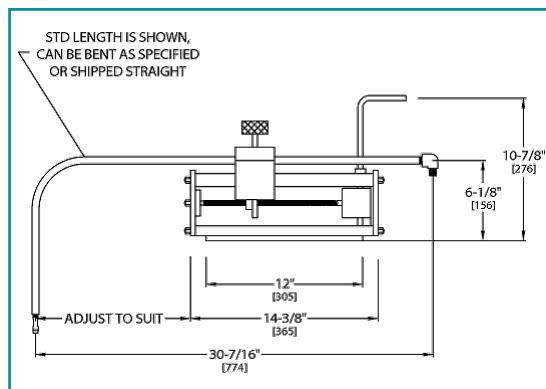

**Top View**

**End View**

**Side View**

**Adjusta Trim Squirt "PLUS"**

Additional features of the "PLUS" machine include:

- Pressure gauges and needle valves allow fine tuning of water pressure at the trim nozzle.
- Micro-adjustment to precision align each nozzle cut
- Increased capacity filtering for longer protection of linear stream
- Flexible piping and on/off valves with quick disconnects
- Easy to install and operate

## Operator Safety - Our Number One Motivation for the Design!

Adjust the trim and change nozzles from a SAFE location! All three squirts move at the same time with the easy turn of a handle. Simply loosen the clamping knob and remove the squirt tubes from the machine to make a nozzle change - then replace it to the exact same trimming location by utilizing the unique "double locking collar" system.

# High Pressure Cleaning Nozzles

## Threaded NDL Type

NDL

NDL'A"

NDL''B''

| Nozzle Type | Inlet Connection | Length | Internal Hex | External Hex |
|-------------|------------------|--------|--------------|--------------|
| NDL         | 9/16" - 24 UNEF  | .56"   | -            | 11/16"       |
| NDL "A"     | 9/16" - 24 UNEF  | .62"   | 5/16"        | -            |
| NDL "B"     | 9/16" - 24 UNEF  | .56"   | -            | 11/16"       |

DIMENSIONAL DATA

Our NDL Style nozzles are typically used in high pressure oscillating cleaning showers. All models have a standard 316SS body and are available with a 316SS, Ceramic or Ruby Orifice. Body Styles include the standard external Hex without O-Ring, or an internal or external Hex with O-Ring.

| M32E        | M32                   | 0.95" | 0.345" | 0.75" |

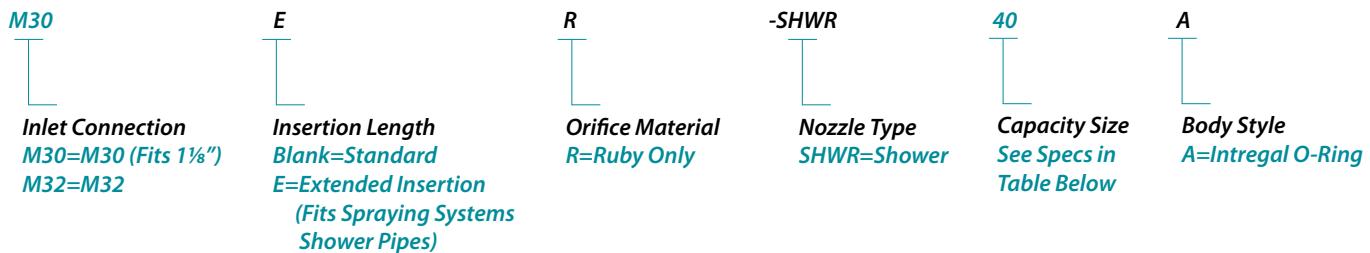

DIMENSIONAL DATA

These solid stream nozzles are designed to replace the three-piece nozzle /gasket / retainer system in use on many brush-type shower pipes. The integral threads and o-ring significantly reduce change-out time and eliminate the possibility of poor seals or dropped components. Available with a Ruby Orifice in M30 or M32 threads.

## How to Order

Example: **M30E-R-SHWR40A**

DIMENSIONAL DATA

SHWR

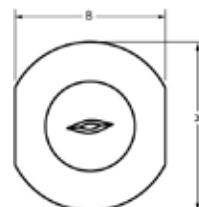

SHWRK

Disc-Type Fan Nozzles are for use in brush-type showers where the internal brush is used to clean the nozzle orifice. Our standard shower nozzles will fit Spraying Systems and STAMM shower pipes while our "K" Type fits KADANT Showers designed for this style. Our shower series nozzles are made in 316SS material and are shipped with a sealing gasket.

# Flush Mounted Shower Nozzles

BT & BN

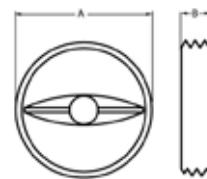

BT

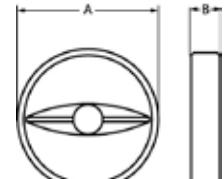

BN

| Nozzle Type     | Thread Size | Thickness |
|-----------------|-------------|-----------|
| BT              | 5/8" UNF    | 1/8"      |
| BN (Threadless) | 5/8"        | 1/8"      |

DIMENSIONAL DATA

BT

BN

Our BT and BN Style nozzles are used in shower pipes where low profile mounting is required. The BT Nozzle threads directly into the shower pipe for a flush mounting. The BN Style nozzle is held in place with a Retainer Cap.

| PN          | 3/4" - 20UNEF    | 1-5/8"   | 1-1/2" |

DIMENSIONAL DATA

LD

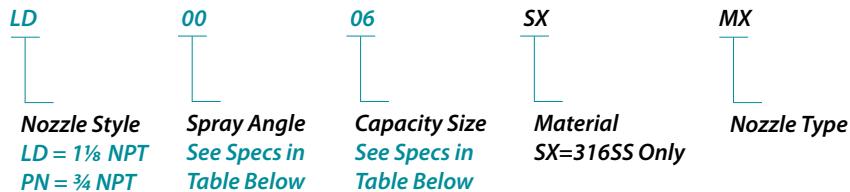

PN

Gatewood Self-Cleaning Nozzles are designed to be able to be cleaned while still in service. Lowering the pipe pressure causes the orifice to open allowing it to purge. Once the pipe pressure is increased, the orifice closes again to make the proper spray pattern. Two Styles are available, the LD version is designed for pipes with a machined flat. The PN version comes with a saddle for installation on pipes without a machined flat.

| PN          | 3/4" - 20UNEF    | 1-5/8"   | 1-1/2" |

DIMENSIONAL DATA

LD

PN

Gatewood Self-Cleaning Nozzles are designed to be able to be cleaned while still in service. Lowering the pipe pressure causes the orifice to open allowing it to purge. Once the pipe pressure is increased, the orifice closes again to make the proper spray pattern. Two Styles are available, the LD version is designed for pipes with a machined flat. The PN version comes with a saddle for installation on pipes without a machine flat.

DIMENSIONAL DATA

Our Threaded Flat Spray Nozzles can be used for many applications in the paper industry, including chemical and lube showers, debarking, groundwood stone washing, pulp bleaching, wall wash, cleaning dandy rolls and caked wires. The small orifice VVJBMX is available with a replaceable filter screen to help prevent plugging.

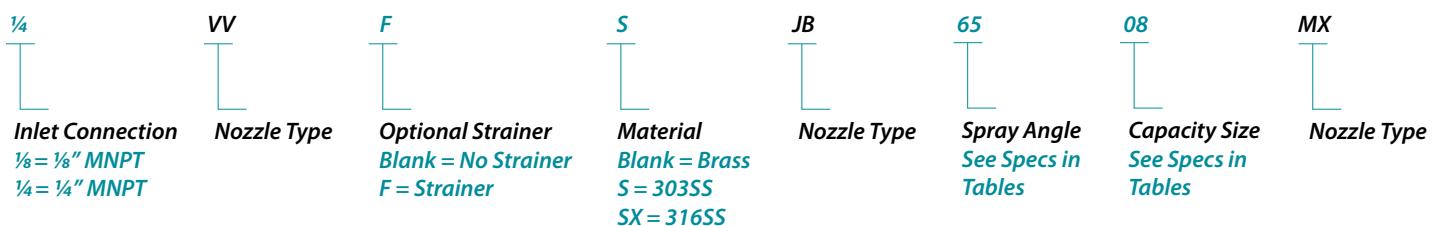

### How to Order - UJBMX- Regular Orifice

Example: **1/4USXJB2570MX**

### How to Order -VVJBMX - Small Orifice

Example: **1/4VVFSJB6508MX**

Replacement FilterScreens Can Be Ordered As:

#### For 1/8VVFJBMX:

- 1/8FIL-200S (Orifice Sizes up to 0.018")
- 1/8FIL-100S (Orifice Sizes from 0.019" to 0.031")
- 1/8FIL-50S (Orifice Sizes 0.032" and larger)

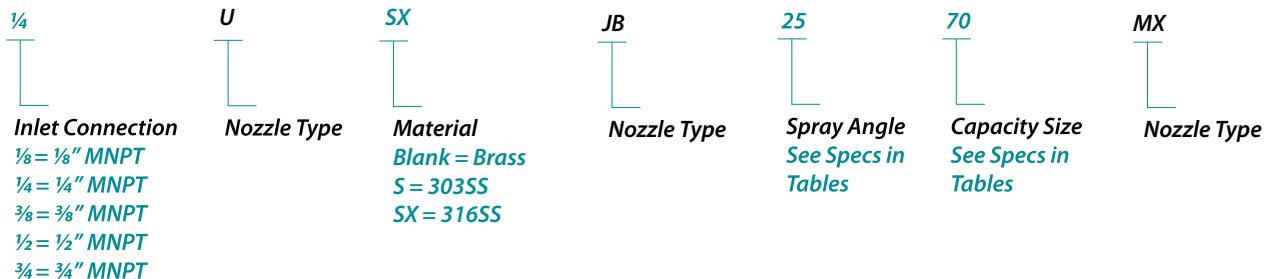

#### For 1/4VVFJBMX:

- 1/4FIL-200S (Orifice Sizes up to 0.018")
- 1/4FIL-100S (Orifice Sizes from 0.019" to 0.031")
- 1/4FIL-50S (Orifice Sizes 0.032" and larger)

# Quick-Connect Flat Fan

QUJBMX & QVVJBMX

QUJBMX

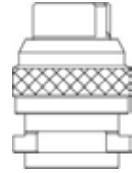

QVVJBMX

| Nozzle Type | Length  |
|-------------|---------|
| QUJBMX      | 7/8"    |
| QVVJBMX     | 1-1/32" |

DIMENSIONAL DATA

QUJBMX

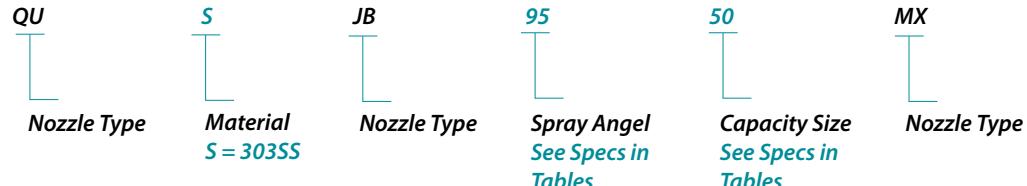

QVVJBMX

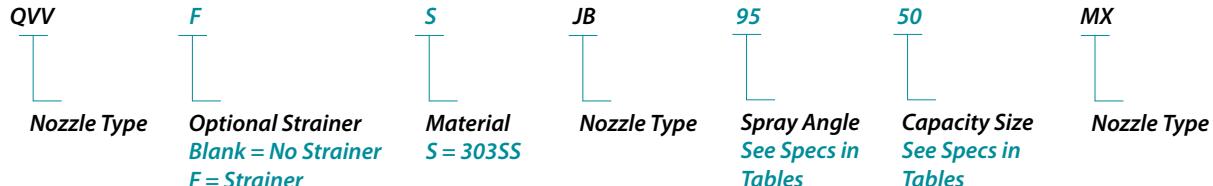

The QUJBMX and QVVJBMX Flat Fan Nozzles and Gaskets are designed for use with a Quick-Connect base to allow easy changeout for shower bars that require regular maintenance.

## How to Order

Example: **QU\$JB9550MX**

Example: **QVVFSJB11002MX**

Replacement Gaskets: **QVGSKT**

Standard Bases: **1/4QJSJBMX; 1/4QJJSJBMX**

Replacement FilterScreens Can Be Ordered As: **1/8FIL-200S (Orifice Sizes up to 0.018")**

**1/8FIL-100S (Orifice Sizes from 0.019" to 0.031")**

**1/8FIL-50S (Orifice Sizes 0.032" and larger)**

# Low Impact Nozzles

## Threaded Deflected Flat Fan Nozzles

KJBMX

| Inlet Connection | Length  | Hex    |
|------------------|---------|--------|
| 1/8              | 1"      | 7/16"  |
| 1/4              | 1-7/32" | 9/16"  |
| 3/8              | 1-3/4"  | 11/16" |
| 1/2              | 2"      | 7/8"   |
| 3/4              | 2-9/16" | 1-1/2" |

DIMENSIONAL DATA

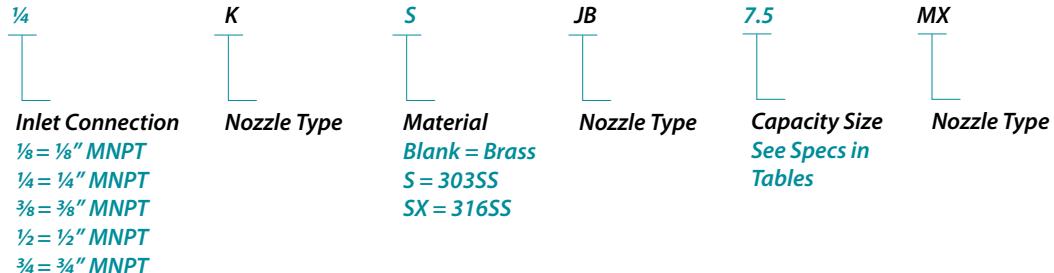

KJBMX

Our KJBMX nozzle produces a wide angle, low impact, flat spray pattern, making it ideal for lube and foaming showers, wall wash, sludge removal from ponds and perimeter wire foam control.

### How to Order

Example: **1/4KSJB7.5MX**

### Specifications - Capacities .25 to 27

DIMENSIONAL DATA  
Based on the largest version.

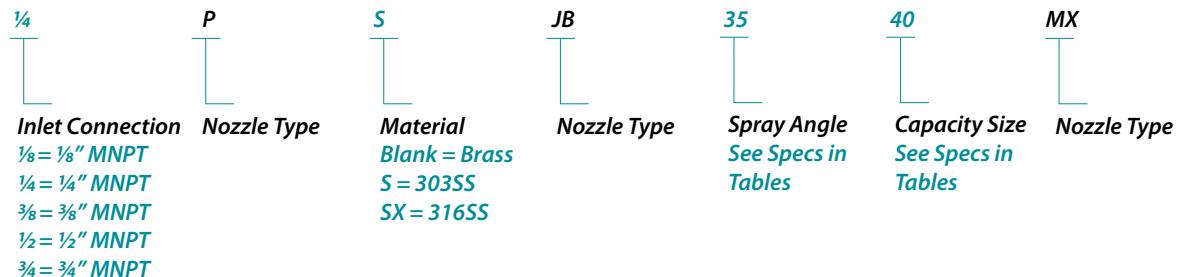

PJBMX

Our PJBMX nozzle produces a high impact, flat spray pattern, making it ideal for deckle sprays and knock-off showers in save-alls and difficult locations.

## How to Order

Example: **1/4PSJB3540MX**

DIMENSIONAL DATA

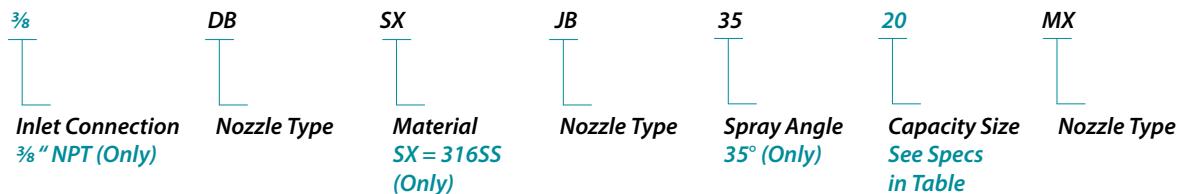

DBJBMX

Our Decker Blaster Nozzle is perfect for use in disc filters / save-alls. The high impact fan is ideal for peeling the mat off rotating discs, and the integral full-port ball valve allows for fast and efficient cleaning of the nozzle to eliminate the problem of plugging. Turning the handle 90° opens the orifice to allow flushing. A further 90° turn, cleans the orifice tip. Turning the handle back to it's original position, resets the nozzle - all while it remains in place.

GJBMX - DIMENSIONAL DATA

Full Cone Nozzles are extremely versatile and can be used in many applications. The GJBMX nozzles are a three-piece nozzle with a removable cap and vane. The HHJBMX is a one-piece nozzle with a press fit vane that is not easily removable.

BJBMX

BJBMX - DIMENSIONAL DATA

Hollow Cone nozzles use centrifugal force internally to create a high quality, small droplet size with a low impact pattern. These nozzles are ideal for cooling or gentle cleaning & coating applications.

**DIMENSIONAL DATA**

Hydraulic atomizing nozzles use a core and orifice design to produce a hollow cone of very fine droplets using liquid pressure alone. The fine droplets are great for cooling, humidification or spraying on trim nozzles to prevent pulp build-up. The MJBMX features a one-piece design with fitted core. The LNJBMX, LNNJBMX, NJBMX and NNJBMX have a removable orifice tip and core for easy cleaning. Additionally, the LNJBMX and LNNJBMX feature an integral strainer screen.

## How to Order

DIMENSIONAL DATA

JYJBMX

JZJBMX

Air Atomizing Nozzles use a combination of compressed air and liquid to produce a highly atomized spray pattern at low flow rates. Comprised of a body and associated spray set up (air cap & fluid cap) - a wide range of spray patterns and flows can be accommodated. Internal mix set ups combine air and liquid inside the air cap. In this arrangement, the streams are not independent, meaning changing your air flow will affect your liquid flow. Internal mix set ups can produce the finest atomization but are not suited for viscous fluids. External mix set ups combine the air and liquid outside for the air cap allowing air and liquid flow rates to be controlled independently. In most cases external set ups do not atomize as finely but can be used with more viscous fluids.

## How to Order - Spray Set-Ups

Example: 1/4JSJBMX+F10S

Adjustable Ball Joints

Flexible Hose

**Adjustable Ball Joints** allow for precision positioning of a spray nozzle without the hassle of installing additional piping. They are available in Brass, 303SS and 316SS.

## **Tips and Pointers**

1. The most common reason for trim nozzle failure is poor water quality. Proper water filtering is critical for optimum nozzle performance.
2. The most effective trim nozzle set-up is realized by aiming the stream slightly toward the outside of the wire and slightly toward the dry end of the machine.
3. To minimize sweating on the pipe, consider using trim water at stock temperature.
4. Extreme care must be taken with application of teflon tape when changing a nozzle. To avoid plugging the small orifice with teflon tape, do not apply tape over the end of the last thread.

### **Contact Us for Flow Information.**

## **Trim Water Supply Systems**

Over the years, many customers have come to us with problems of inconsistent water supply to their trim nozzles.

Common complaints are poorly filtered water, or unstable pressure due to their trim water being tied into the same water source used to supply other parts of the machine.

Our Trim Water Supply Systems provide a clean, reliable water supply for your trim nozzles.

Available in single or duplex versions (for redundancy) we offer a number of options around filtration, storage tanks and deaeration, all from the name that's been synonymous with edge trimming for over 50 years.

Please contact us for more information.
