Checklist and Suggested Specifications for HART Fabricated Products 36
Installation and Maintenance Instructions for HART Fabricated Strainers 37
Limited Warranty 37
How To Order 38

Notes: The material in this catalogue is for general information. For specific performance data and proper material selection, consult factory or your HART representative. Although every attempt has been made to ensure that the information contained in this catalogue is correct HART Company Ltd. reserves the right to change designs, materials and/or specifications without notice.

Limited Warranty

All products are warranted to be free of defects in material and workmanship for a period of one year from the date of shipment, subject to the limitations below: If the purchaser believes a product defective, the purchaser shall: (a) Notify the manufacturer, state the alleged defect and request permission to return the product. (b) If permission is given, return the product with transportation prepaid. If the product is accepted for return and found to be defective, the manufacturer will, at its discretion, either repair or replace the product, f.o.b. factory, within 60 days of receipt, or refund the purchase price.

Other than to repair, replace or refund described above, the purchaser agrees that the manufacturer shall not be liable for any losses, costs, expenses or damages of any kind arising out of the product, its use, installation or replacement, labeling, instructions, information or technical data of any kind, description of product use, sample or model, warnings or lack of foregoing. No other warranties, written or oral, expressed or implied, including the warranties of fitness for a particular purpose and merchantability, are made or authorized.

No affirmation of fact, promise, description of product use or sample or model shall create any warranty from the manufacturer, unless signed by the president. These products are not manufactured, sold or intended for personal, family or household purposes.

Products:

- Standard line of Temporary, Tee, Y, Basket and Duplex strainers.
- Custom strainers to meet individual space or performance requirements.
- Automated self-cleaning strainers/systems.
- Screens and baskets.

Available Materials of Construction:

- Carbon Steel
- Low Temp. Carbon Steel
- Stainless Steel
- Chrome Molly
- Monel
- Alloy 20
- Hastelloy
- Titanium

End Connections:

- Flat Faced
- Raised Face
- RTJ Flanged
- Butt-weld
- Grooved
- Threaded (NPT)
- Socket Weld

Size Range:

- 1/4" (8mm) and larger

Applications:

- Process Industry
- Power Industry
- Chemical Industry
- Oil and Gas
- Pulp and Paper
- Metals and Mining
- Water and Waste

Design Features:

- Standard sizes from 3/4" - 48".
- Used primarily for new pipeline start-up or where solid loading is minimal.
- Filtration as fine as 40 microns available.
- Available in conical, basket and plate configurations.
- Available flat faced, raised face or RTJ with or without face serrations.
- All 304 SS construction is standard. Construction in other materials is available (i.e carbon steel, monel, hastelloy, titanium, etc.).
- May be installed in horizontal or vertical pipelines with cone pointed upstream or downstream.
- Strainer size and pressure rating is stamped on handle.

Parts List and Standard Materials		
Part	Carbon Steel	304 Stainless Steel
Ring	A36	A240-304
Handle	A36	A240-304
Perforated Plate	A36	A240-304
Mesh 1	A276-304	A276-304

Note: 1. When required and when used.

- Notes:**
1. Strainers suitable for large differential pressures are available. Please see page 30 for standard ratings.
 2. Mesh lined strainers manufactured for unidirectional flow cannot be used for bi-directional flow. Please specify the bi-directional flow requirement when ordering.
 3. Please specify if handles are to be stamped with tag numbers when ordering.

Notes: 1. The Open Area % is calculated as follows:

$$OA\% = \frac{\text{Screen Area} \times 0.4}{\text{Area of Sch. 40/std. pipe.}} \times 100$$

General:

- For further optional features see pages 21-22.
- Other perforations and screen materials available. Please see page 24.

- Thicker material available upon request. Please contact factory.
- Strainers are available in many materials with many different screen openings. Please consult factory.
- Other sizes available on request.

- For pressure loss information see page 25.
- For ordering information please see page 38.
- Dimensions shown are subject to change. Contact factory for certified prints when required.

Design Features:

- Standard sizes from 2" - 24".
- Available with RF or RTJ flanged (ASME B16.5), Buttweld (ASME B16.9) or grooved end connections.
- Standard thru bolt or grooved cover design.
- Custom modifications are available.
- May be installed in horizontal or vertical pipelines.
- All welders are qualified to ASME Section IX.
- Strainers designed to meet the requirements of ASME B31.1 and/or ASME B31.3.
- 304 SS perforated screens are standard.
- Drains connections are standard and are furnished with plug.
- Vents, differentials and special covers are optional.

Parts List and Standard Materials (Flanged End)

Part	Carbon Steel	Stainless Steel 1
Shell & Nozzles	A53 E/B / A106-B	A312
Reinforcement Pads 2	A516-70	A240
Flanges	A105	A182
Coupling/threadolet:	A105	A182
Plug	A105	A182
Screen Retainer Ring	A36	A240
Screen 3	304 SS	304 SS
Gasket 3	304 SS Spiral Wound	304 SS Spiral Wound
Stud	A193-B7	A193-B8-1
Nut	A194-2H	A194-8

- Notes:** 1. 304 SS strainers use 304 grade material. 316 SS strainers use 316 grade material. Dual rated material may be used.
 2. When required and when used.
 3. Recommended Spares.

Parts List and Standard Materials (Grooved End)

Part	Stainless Steel
Shell & Nozzles	A312-304
Flanges	A36 Zinc Plated
Plug	B584 Brass
Cover	Sizes 2 1/2" - 5" & 12": Ductile Iron Sizes 6" - 10": 304 SS
Screen 1	304 SS
Gasket 1	EPDM
Bolts	B633
Nuts	B633

- Notes:** 1. Recommended Spares.
 2. Lead-free construction complies with California Prop. 65 and proposed Federal Government lead-free standards.
 3. Single, two-bolt, grooved style cover provides quick and easy access to screen.

Upper Pressure Limits (Non-Shock) and Lower Temperature Limits (Unless otherwise specified)

HART Model	Body Material	Size Range in. (mm)	Maximum Design Pressure psig (Bars) 1	Low Temperature Limit - M.D.M.T. - °F (°C)
Y125FSBW	Carbon Steel	2" - 12" (50mm - 300mm)	200 (13.79) 2	-20 (-28.9)
		14" - 24" (350mm - 600mm)	150 (10.34) 2	-20 (-28.9)
Y125GSS4GW	304 SS	2 1/2" - 12" (65mm - 300mm)	200 (13.79) 2	-20 (-28.9)
Y125FSS4BW / Y125FSS6BW	304 / 316 SS	2" - 12" (50mm - 300mm)	200 (13.79) 2	-20 (-28.9)
		14" - 24" (350mm - 600mm)	150 (10.34) 2	-20 (-28.9)
Y125FSS4LBW / Y125FSS6LBW	304L / 316L SS	2" - 12" (50mm - 300mm)	200 (13.79) 2	-20 (-28.9)
		14" - 24" (350mm - 600mm)	150 (10.34) 2	-20 (-28.9)
Y150FSBW	Carbon Steel	2" - 12" (50mm - 300mm)	285 (19.65) 3	-20 (-28.9)
Y150FSS4BW / Y150FSS6BW	304 / 316 SS	2" - 12" (50mm - 300mm)	275 (18.96) 3	-20 (-28.9)
Y150FSS4LBW / Y150FSS6LBW	304L / 316L SS	2" - 12" (50mm - 300mm)	230 (15.86) 3	-20 (-28.9)

- Notes:** 1. All strainers will be designed to the maximum design pressure unless an alternative design pressure / temperature combination is specified. In many cases a cost savings will result if lower design pressures are acceptable.
 2. M.A.W.P. at 150°F.
 3. M.A.W.P. at 100°F.

Notes: 1. Differentials are optional.

2. Butt weld dimensions are same as flanged.

General:

1. For further optional features see pages 21-22.

2. Other perforations and screen materials available.

Please see page 24.

3. For pressure loss information see page 25.

4. For ordering information please see page 38.

5. Dimensions shown are subject to change.

Contact factory for certified prints when required.

Design Features:

- Standard Sizes from 2" - 24". Larger sizes available upon request.
- Available with RF or RTJ flanged (ASME B16.5) or Buttweld (ASME B16.9) end connections.
- Standard thru bolt cover design.
- Three flow configurations are available.
- 304 SS perforated screens are standard.
- Upstream and downstream screen supports allow for bi-directional flow 1.
- May be installed in horizontal or vertical pipelines.
- All welders are qualified to ASME Section IX.
- Strainers designed to meet the requirements of ASME B31.1, ASME B31.3 and/or ASME Section VIII, Div. 1.
- Drains, vents, differentials and special covers are optional.

Notes: 1. This requirement must be specified for strainer screens requiring mesh lining.

Stud	A193-B7	A193-B7	A193-B8-1
Nut	A194-2H	A194-2H	A194-8

- Notes:** 1. 304SS strainers use 304 grade material. 316SS strainers use 316 grade material. Dual rated material may be used.
2. Recommended Spares.
3. When required and when used.
4. NACE MR01-75 qualification available upon request. Material specifications will change.
5. Also available in other alloys.

Upper Pressure Limits (Non-Shock) and Lower Temperature Limits (Unless otherwise specified)

HART Model at (RF Flanged)	Body Material	Maximum Design Pressure – 100°F – psig (Bars) 1	Lower Temperature Limit – M.D.M.T. – °F (°C)

Design Features:

- Standard sizes from 2" - 24". Larger sizes available upon request.
- Available with RF or RTJ flanged (ASME B16.5) or Buttweld (ASME B16.9) end connections.
- Standard thru bolt cover design.
- Custom designs are available.
- Perforated screens are standard.
- May be installed in horizontal pipelines.
- All welders are qualified to ASME Section IX.
- Strainers designed to meet the requirements of ASME B31.1, ASME B31.3 and/or ASME Section VIII, Div. I.
- Drain is standard and is complete with plug.
- Vents, differentials and special covers are optional.

Pars List and Standard Materials

Notes: 1. Vents and Differentials are optional.
 2. Cover lifting lug standard on sizes 10" and larger.

General:
 1. For further optional features see pages 21-22.
 2. Other perforations and screen materials available. Please see page 24.

3. For pressure loss information see page 25.
 4. For ordering information please see page 38.
 5. Dimensions shown are subject to change. Contact factory for certified prints when required.

- Notes:**
1. Vents and differentials are optional.
 2. Cover lifting lug standard on sizes 6" and larger.

- General:**
1. For further optional features see pages 21-22.
 2. Other perforations and screen materials available. Please see page 24.

3. For pressure loss information see page 25.
4. For ordering information please see page 38.
5. Dimensions shown are subject to change. Contact factory for certified prints when required.

Design Features:

- Inlet/outlet connections are FF flanged in accordance with ASME B16.1.
- Four individual operated butterfly valves (HART series BII25W/L) are used to divert and isolate flow.
- 304 SS perforated screens are standard.
- Cast components.
- Quick opening clamp covers (MAWP 50 psig) are optional.
- Drain connections furnished with plug as standard.
- Inexpensive construction and quick delivery.

Parts List and Standard Materials		
Part	Description	Specifications
Basket Strainers x 2	HART Model BI25FIBI or BI25FICI Screen 1: Cover Gasket 1:	ASTM A126-B Type 304 SS Graphite
Butterfly Valves x 4	HART Series BII25W/L Seat: Disc:	ASTM A126-B EPDM or Buna-N 316 SS, Bronze or Ductile Iron.
Flanged Fittings x 4	Cast Iron	ASTM A126-B
Hardware:	Carbon Steel	ASTM A193-B7, A194-2H
Gaskets	Rubber	

Notes: 1. Recommended Spares.
 2. Consult the HART "Simplex Basket Strainer" and "Butterfly Valve" brochures for detailed information on these items.

Upper Pressure Limits (Non-Shock)	
Size	M.A.W.P.
5" - 12" (125mm - 300mm)	200 psig.

Upper Pressure Limits (Non-Shock)	
Body Material	Lower Limit °F (°C)
A126-B	-20 (-28.9)

Upper Pressure Limits (Non-Shock)	
Substance	Upper Limit
Fluids	30 Ft/s (10 m/s)
Gases	200 Ft/s (65 m/s)

Notes: For greater velocities consult factory.

- Notes:**
1. Strainers may be supplied with 50 psig clamped covers. Please contact factory.
 2. Vents and differential connections are optional.

- General:**
1. For further optional features see pages 21-22.
 2. Other perforations and screen materials available. Please see page 24.

3. For pressure loss information see page 25.
4. For ordering information please see page 38.
5. Dimensions shown are subject to change. Contact factory for certified prints when required.

Design Features:

- Standard sizes from 6" - 24".
- Available with RF or RTJ flanged (ASME B16.5) or Buttweld (ASME B16.9) end connections.
- Standard thru bolt cover design.
- Custom modifications are available.
- May be installed in horizontal pipelines.
- All welders qualified to ASME Section IX.
- Strainers designed to meet the requirements of ASME B31.1, ASME B31.3 and/or ASME Section VIII, Div. I.
- Four individual operated butterfly valves (HART series B1125W/L) are used to divert and isolate flow. Ball, gate and other isolation valve types may be used if requested.
- 304 SS perforated screens are standard.
- Drains and differential connections are standard and are furnished with plug.
- Vents and special covers are optional (See pages 21-22).

- Notes:**
1. Other sizes available. Consult factory.
 2. Dimensions can be modified to suit the customers requirements. Please consult factory.
 3. Legs and other supports are available.
 4. Vents are optional.

- General:**
1. For further optional features see pages 21-22.
 2. Other perforations and screen materials available. Please see page 24.

3. For pressure loss information see page 25.
4. For ordering information please see page 38.
5. Dimensions shown are subject to change. Contact factory for certified prints when required.

The quick opening covers and cover removal aids available on HART fabricated strainers are distinguished by their compact size and functional design. Materials of construction are in accordance with ASME specifications and manufacturing complies with the applicable rules of the ASME Code for Pressure Piping and with the ASME Boiler and Pressure Vessel Code.

Cover Type BD – Davit Assembly

The Davit assembly is used to enable the user to swing the cover away from the strainer in order to facilitate basket or screen removal for cleaning. It's primary use is for larger sized strainers where cover removal is difficult. The davit assembly is an inexpensive alternative to quick release covers, especially when operating conditions require a bolted cover to be utilized.

Cover Type H – T-Bolt Hinged Cover

The T-bolt hinged cover is used for nominal pressure applications while being the most inexpensive closure available on HART fabricated strainers. The T-bolt hinged cover is opened quickly and easily using an O-Ring as a seal. The operator merely loosens the T-bolts until they clear the holding lugs and allow the head to be swung open on it's hinge. Camlock and Break-over Wrench assemblies are also available that eliminate the need for a wrench.

Cover Type Y – Yoke Hinged Cover

The yoke hinged closure is a true ANSI rated closure. Used primarily on high pressure applications, yoke hinged covers are available with 150%, 300%, 600%, 900%, and 1500% ANSI ratings. Yoke hinged covers available on HART fabricated strainers are available with a wide range of operating aids ranging from single-lever chain and sprocket drives to completely automated types. O-rings are utilized as the sealing member.

Cover Type T – Quick Opening Threaded Cover

The threaded cover closure consists of a cap which fastens to a hub that has been welded to the strainer body. The female cap is threaded onto the male hub and an O-Ring is utilized to make the seal. The placement of this O-Ring prevents corrosion of the closure threads allowing for long, trouble free service. The threaded closure can be utilized on both nominal and high pressure applications.

General Comparison of Different Closure Types

Comparison Item	Closure Type				
	Bolted Type B	Bolted with davit Type BD	Swing Bolt Hinged Type H	Yoke Type Y	Threaded Type T
Cost (Ranking 1 = Least Expensive)	1	2	3	4	4
Quick Opening Ability (Ranking 1 = Quickest)	5	4	3	1	1
Low Pressure Applications (Recommended Closures)	X	X	X		
Nominal Pressure Applications (Recommended Closures)	X	X	X	X	X
High Pressure Applications (Recommended Closures)	X	X		X	X

Design Features:

HART design's and manufactures baskets for all makes of basket and duplex strainers. The range of materials and size of units is unlimited.

HART is able to provide baskets manufactured from:

- Perforated Plate
- Mesh or Mesh/Perf. combination
- Wedge Wire
- Electron Beam Small Hole Perforated Plate

Using the above processes or combination thereof, HART can provide screens and baskets suitable for a wide range of applications.

Screen/Basket Checklist

Kindly photocopy this page and fill out the pertinent information.

BASKET STRAINER
STYLE "1"

Performance Requirements

Description	Customer's Requirement
Required Level of Filtration	_____
Material of Construction	_____
Minimum Specified Burst Pressure	_____
Flow Direction	_____
Other	_____

Dimensional Requirements

Description	Customer's Requirement

Basket Outer Diameter	A
Basket Height	B
Ring OD	C
Overall Height	D
Ring Thickness	E
Basket Long Height	F

BASKET STRAINER
STYLE "2"

Factors To Consider

Purpose

If the basket strainer is being used for protection rather than direct filtration, HART's standard screens will suffice in most applications.

Service

With services that require extremely sturdy screens, such as high pressure/ temperature applications or services with high viscosities, HART recommends that perforated screens without mesh liners be used. If mesh is required to obtain a certain level of filtration, then HART recommends a trapped perf./mesh/perf. combination.

Filtration Level

When choosing a perf. or a mesh/perf. combination attention should be given to ensure overstraining does not occur. As a general rule the specified level of filtration should be no smaller than half the size of the particle to be removed. If too fine a filtration is specified the pressure drop through the strainer will increase very rapidly, possibly causing damage to the basket.

Screen Types/Dimensions

$\frac{1}{4}$ " Dia. - 40% O.A.	$\frac{3}{16}$ " Dia. - 50% O.A.	$\frac{5}{32}$ " Dia. - 58% O.A.	$\frac{1}{8}$ " Dia. - 40% O.A.	$\frac{3}{32}$ " Dia. - 39% O.A.	$\frac{1}{16}$ " Dia. - 37% O.A.	$\frac{3}{64}$ " Dia. - 36% O.A.	$\frac{1}{32}$ " Dia. - 40% O.A.	0.027" Dia. - 23% O.A.	20 Mesh - 49% O.A. 0.035" Openings	30 Mesh - 45% O.A. 0.022" Openings	40 Mesh - 41% O.A. 0.016" Openings	60 Mesh - 38% O.A. 0.010" Openings	80 Mesh - 36% O.A. 0.008" Openings	100 Mesh - 30% O.A. 0.006" Openings
---------------------------------	----------------------------------	----------------------------------	---------------------------------	----------------------------------	----------------------------------	----------------------------------	----------------------------------	------------------------	---------------------------------------	---------------------------------------	---------------------------------------	---------------------------------------	---------------------------------------	--

- Notes:**
1. Screen openings other than those shown above are readily available. HART inventories various mesh sizes as fine as 5 micron and perforated plate as coarse as $\frac{1}{2}$ " Dia.
 2. Screens are available in a wide range of materials. HART inventories various screen material in Carbon Steel, Stainless Steel (304, 316), Alloy 20, Monel 400, Hastalloy C and Titanium Grade 2.
 3. Custom manufactured screens are available upon request. Please consult factory.

Temporary Strainer Pressure Drop – Liquids (Sizes 3/4" - 5")

FIGURE 1

Temporary Strainer Pressure Drop – Liquids (Sizes 6" - 48")

FIGURE 2

Notes: 1. Pressure drop curves are based on water flow with standard screens.
 See page 28 for correction factors to be used with other fluids and/or screen openings.

Fabricated Y-Strainer Pressure Drop – Liquids (Sizes 2" - 24")

FIGURE 3

Tee Strainer Pressure Drop – Liquids (Sizes 2" - 24")

FIGURE 4

Notes: 1. Pressure drop curves are based on water flow with standard screens.
 See page 28 for correction factors to be used with other fluids and/or screen openings.

Fabricated Basket Strainer Pressure Drop – Liquids (Sizes 2" - 24")

FIGURE 5

Screen Correction Factor Chart (For Non-Standard and Mesh Lined Screens)

*Multiply values obtained from figure 1 thru 6 by the appropriate values shown below

Chart #1

Size Range	SCREEN OPENINGS							
	Perforated Plate					Mesh lined standard screens		
	% Screen Material Open Area					% Screen Material Open Area		
	60%	50%	40%	30%	20%	50%	40%	30%
1/4" - 1 1/2"	0.45	0.55	0.7	1	1.15	1.05	1.05	1.2
2" - 48"	0.65	0.8	1	1.4	2.15	1.05	1.05	1.2

- Notes: 1. See page 24 for % Open Areas of HART inventoried perforated plate.
 2. Standard screens for sizes 3/4" to 1 1/2" is approximately a 30% open area screen media.
 3. Standard screens for sizes 2" and larger is approximately a 40% open area screen media.

Example:

Strainer Size: 10"
HART Model: B150FSBWI
Filtration: 100 Mesh lined 1/8" Perf.
Flow rate: 3000 GPM
Service: Water

- A) Using figure 5 the pressure drop is determined to be 2.0 psid with HART standard screen.
 B) Looking at page 26 we find that the % Open area of 100 mesh is 30%.
 C) Using chart 1 we read the correction factor to be 1.2 for 100 mesh lined 1/8" perf.
 D) Total pressure drop equals $2.0 \times 1.2 = 2.4$ psid clean.

Viscosity and Density Correction Factor Chart

Chart #2

Size Range	Component Factor (CF)	Viscosity Cp	Body Loss Factor (BF)	Screen Loss Factor			
				Perf alone (PF)	20 Mesh Lined (MF)	30, 40, Mesh Lined (MF)	60 to 300 Mesh Lined (MF)
3/4" - 1 1/2"	0.25	10	1	1.15	1.3	1.4	1.5
2" - 48"	0.35	25	1.2	1.25	2	2.2	2.5
		100	1.6	1.4	3	4	6.5
		200	2.2	1.5	4.5	7	11.5
		500	4.4	1.6	10	15	25
		1000	8	1.7	15	30	50
		2000	15.2	1.9	30	60	100

How to Use:

- Determine the pressure drop (P1) through the strainer with water flow and standard screens.
- If non-standard screens (i.e. 40 mesh, etc.) are being used, apply factors in Chart #1 to determine corrected pressure drop (P2).
- Multiply P1 or P2 (if used) by the specific gravity of the fluid actually flowing through the strainer to get P3.
- Using Chart #2 multiply P3 by the appropriate Component Factor (CF) to get P4.
- Let $P5 = P3 - P4$.
- Multiply P4 by the appropriate Body Loss Factor (BF) in Chart #3 to get P6.
- Multiply P5 by the appropriate Screen Loss Factor (PF or MF) in Chart #3 to get P7.
- Total pressure drop $P8 = P6 + P7$.

Example:

Strainer Size: 10"
HART Model: B150FSBWI
Filtration: 100 mesh lined 1/8" perf.
Flow rate: 3000 GPM
Specific Gravity: 1
Viscosity: 100 cP

- A) As shown in the above example, the corrected pressure drop (P2) = 2.4 psid
 B) Since S.G. = 1, $P3 = P2 = 2.4$ psid
 C) Using Chart #2 $P4 = 0.35 \times P3 = 0.84$ psid
 D) $P5 = 2.4 - 0.84 = 1.56$ psid
 E) Using Chart #3 $P6 = 0.84 \times 1.6 = 1.34$ psid
 F) Again using Chart #3 $P7 = 1.56 \times 6.5 = 10.14$ psid
 G) Total pressure drop $P8 = 1.34 + 10.14 = 11.48$ psid clean

Correction Factors For Clogged Screens

* Multiply values obtained from figures 1 thru 6 by the appropriate values shown below

Chart #4

% Clogged	Ratio of Free Screen Area to Pipe Area						
	10:1	8:1	6:1	4:1	3:1	2:1	1:1
10%	-	-	-	-	-	-	3.15
20%	-	-	-	-	-	1.15	3.9
30%	-	-	-	-	-	1.4	5
40%	-	-	-	-	-	1.8	6.65
50%	-	-	-	-	1.25	2.5	9.45
60%	-	-	-	1.15	1.8	3.7	14.5
70%	-	-	-	1.75	2.95	6.4	26
80%	-	1.1	1.75	3.6	6.25	14	58
90%	2.3	3.45	6	13.5	24	55	-

- Notes: 1. See page 35 for the ratio of free area to pipe area for HART Strainers equipped with standard screens.
 2. For screens other than HART's standard, use the following formula to calculate the ratio free area to pipe area:

$$R = \frac{A_g \times OA}{100A_p}$$

where;

- R = Ratio free area to pipe area
- A_g = Gross screen area, sq. in. (See page 35)
- OA = Open area of screen media, % (See page 24, i.e. 1/8" perf. = 40%)
- A_p = Nominal area of pipe fitting, sq. in. (See page 35)

Example #1

Strainer Size: 8"
HART Model: T150FSBW1
Filtration: 1/8" Perf.
Flow rate: 1000 GPM
Service: Water
% Clogged: 20%

- A) Using Figure #4 the pressure drop is determined to be 0.9 psid with HART's standard screen.
- B) Looking at page 35 ratio of free area to pipe area for a 8" HART series T strainer is equal to 1.3:1 (1:1 approx.).
- C) Using Chart #4 we read the correction factor to be 3.9 at 20% clogged.
- D) Total pressure drop equals 0.9 x 3.9 = 3.51 psid when 20% clogged.

Example #2

Strainer Size: 8"
HART Model: T150FSBW1
Filtration: 5/32" Perf.
Flow rate: 1000 GPM
Service: Water
% Clogged: 60%

- A) Using Figure #4 the pressure drop is determined to be 0.9 psid with HART's standard screen.
- B) Looking at page 24 we find that the % Open area (OA) of 5/32" Perf. is 58%.
- C) Using Chart #1 we read the correction factor to be 0.65 for 5/32" Perf.
- D) Total clean pressure drop equals 0.9 x 0.65 = 0.59 psid.
- E) Since a non-standard screen is being used, we must calculate the Ratio free area to pipe area.
- F) Looking at page 35 we find A_g = 167 in², A_p = 50.03 in².
- G) The ratio free area to pipe area is calculated as 1.9:1. (2:1 approx.)
- H) Using Chart #4 we read the correction factor to be 3.7 at 60% clogged.
- I) Total pressure drop equals 0.59 x 3.7 = 2.2 psid when 60% clogged.

Basket Strainer Burst Pressure Chart

FIGURE 7

Notes: 1. The above chart is to be used for strainers manufactured from perforated plate and is based on the formula:

$$t = d \sqrt{\frac{0.3P}{S}}$$

- t = Thickness of perforated plate, in.
- d = Dimension B (See page 4), in.
- P = Burst Pressure, psi
- S = Reduced allowable stress, psi

SOURCE: ASME Section VIII, Div. 1., UG-34.

2. The above chart is based on HART's standard dimensions. Higher burst pressure ratings are available. Please contact factory.
3. The above chart is based on a screen material of stainless steel. No safety factor is incorporated. It is the responsibility of the user to determine an acceptable safety factor.
4. See page 24 for % Open Areas of HART's inventoried perforated plate.

Example:

Strainer Size: 10"
Screen Thickness: 11 gauge
Screen Material Open Area: 20%

- Locate Strainer size.
- Follow vertical line to gauge thickness.
- Follow horizontal line to required perforation open area.
- Follow vertical line downwards to read burst pressure.
- Burst pressure equals 27 psid.

Conical Strainer Burst Pressure Chart

FIGURE 8

Notes: 1. The above chart is to be used for strainers manufactured from perforated plate and is based on the formula:

$$P = \frac{2St \cos 15^\circ}{D + 1.2t \cos 15^\circ}$$

- P = Burst Pressure, psi.
- S = Reduced allowable stress
- t = Thickness of perforated plate, in.
- D = Dimension B (See page 4), in.
- 15° = 15 degree

SOURCE: ASME Section VIII, Div. I., Appendix I.

2. The above chart is based on HART's standard dimensions. Higher burst pressure ratings are available. Please contact factory.
3. The above chart is based on a screen material of stainless steel. No safety factor is incorporated. It is the responsibility of the user to determine an acceptable safety factor.
4. See page 24 for % Open Areas of HART's inventoried perforated plate.

Example:

Strainer Size: 10"
Screen Thickness: 26 gauge
Screen Material Open Area: 30%

- Locate Strainer size.
- Follow vertical line to gauge thickness.
- Follow horizontal line to required perforation open area.
- Follow vertical line downwards to read burst pressure.
- Burst pressure equals 41 psid.

Y-Strainer Burst Pressure Chart

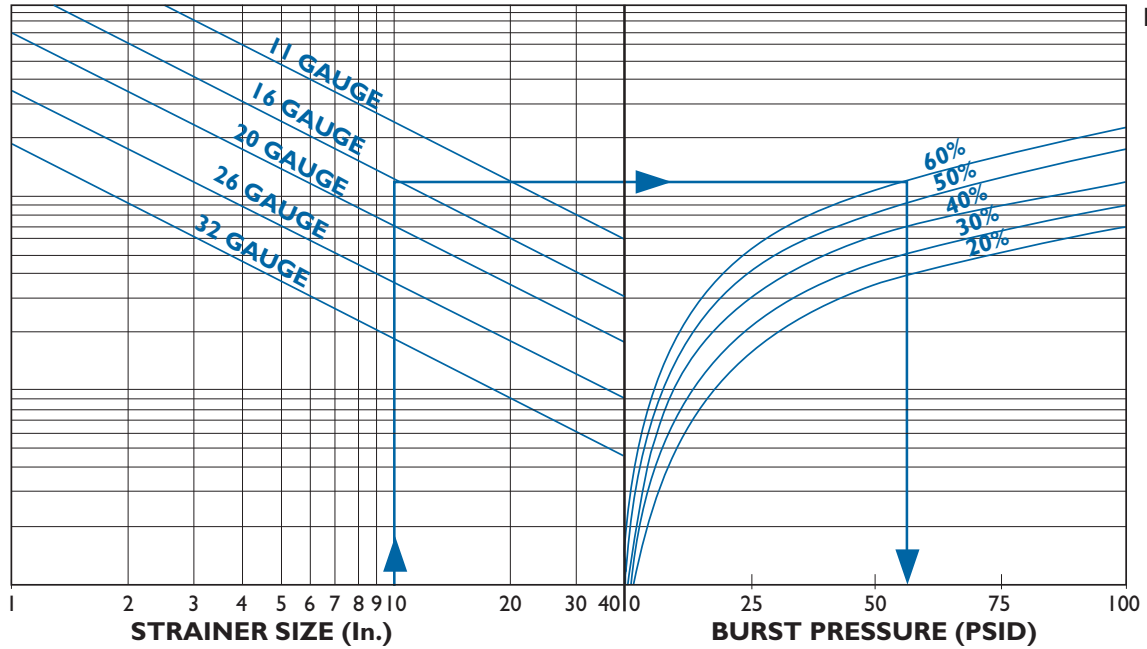

FIGURE 9

Notes: 1. The above chart is to be used for strainers manufactured from perforated plate and is based on the formula:

$$P = \frac{St^2}{R - 0.4t}$$

- P = Burst Pressure, psi
- S = Reduced allowable stress, psi
- t = Thickness of perforated plate, in.
- R = Outside radius of screen, in.

SOURCE: ASME Section VIII, Div. I., Appendix I.

2. The above chart is based on HART's standard dimensions. Higher burst pressure ratings are available. Please contact factory.
3. The above chart is based on a screen material of stainless steel. No safety factor is incorporated. It is the responsibility of the user to determine an acceptable safety factor.
4. See page 24 for % Open Areas of HART's inventoried perforated plate.

Example:

Strainer Size: 10"
Screen Thickness: 16 gauge
Screen Material Open Area: 60%

- Locate Strainer size.
- Follow vertical line to gauge thickness.
- Follow horizontal line to required perforation open area.
- Follow vertical line downwards to read burst pressure.
- Burst pressure equals 56 psid.

Tee Strainer Screen Burst Pressure Chart

FIGURE 10

Notes: 1. The above chart is to be used for strainers manufactured from perforated plate and is based on the formula:

$$t = d \sqrt{\frac{0.3P}{S}}$$

t = Thickness of perforated plate, in.
d = Basket Diameter, in.
P = Burst Pressure, psi
S = Reduced allowable stress, psi

SOURCE: ASME Section VIII, Div. I., UG-34.

3. The above chart is based on HART's standard dimensions. Higher burst pressure ratings are available. Please contact factory.
4. The above chart is based on a screen material of stainless steel. No safety factor is incorporated. It is the responsibility of the user to determine an acceptable safety factor.
5. See page 24 for % Open Areas of HART's inventoried perforated plate.

Example: #1

Strainer Size: 8"
Screen Thickness: 11 gauge
Screen Material Open Area: 40%

- Locate Strainer size.
- Follow vertical line to gauge thickness.
- Follow horizontal line to required perforation open area.
- Follow vertical line downwards to read burst pressure.
- Burst pressure equals 20 psid.

Basket and Duplex Strainer Basket Burst Pressure Chart

FIGURE 11

Notes: 1. The above chart is to be used for strainers manufactured from perforated plate and is based on the formula:

$$t = d \sqrt{\frac{0.3P}{S}}$$

SOURCE: ASME Section VIII, Div. I., UG-34.

- t = Thickness of perforated plate, in.
- d = Basket Diameter, in.
- P = Burst Pressure, psi
- S = Reduced allowable stress, psi

2. As standard, HART supplies baskets with perforated bottoms.
3. The above chart is based on HART's standard dimensions. Higher burst pressure ratings are available. Please contact factory.
3. The above chart is based on a screen material of stainless steel. No safety factor is incorporated. It is the responsibility of the user to determine an acceptable safety factor.
5. See page 24 for % Open Areas of HART's inventoried perforated plate.

Example: #1

Strainer Size: 8"
Basket Type: Perforated screen with 11 gauge solid flat bottom
Screen Material Open Area: 20% - 60%

- Locate Strainer size.
- Follow vertical line to solid thickness.
- Follow horizontal line to solid bottom curve.
- Follow vertical line downwards to read burst pressure.
- Burst pressure equals 19 psid.

Example: #2

Strainer Size: 3"
Basket Type: 11 gauge perforated screen with 11 gauge perforated flat bottom.
Screen Material Open Area: 40%

- Locate Strainer size.
- Follow vertical line to gauge thickness.
- Follow horizontal line to 40% Open Area curve.
- Follow vertical line downwards to read burst pressure.
- Burst pressure equals 44 psid.

- Notes:** 1. Values shown are approximate. Contact factory for exact ratios.
2. Values shown are for strainers with standard screens.
3. The ratio free area to pipe area may be increased by changing perf. stagger or by using heavy wire mesh.

Strainer Check List: When selecting a strainer, please take the factors listed below into account. This will assist us when recommending a strainer to suit your specific requirements. Please photocopy this page and fill out the pertinent information.

1. Fluid to be strained _____
2. Flow rate _____
3. Density of fluid _____
4. Viscosity of fluid _____
5. Fluid working pressure _____
Maximum pressure _____
6. Fluid working temp. _____
Maximum temp. _____
7. Preferred material of strainer construction _____

8. Present pipeline size & material _____
9. Nature of solids to be strained out _____
10. Size of solids to be strained out _____
Size of mesh or perf. req. _____
11. Clearance Limitation Above _____ Below _____
Left side facing inlet _____ Right side facing inlet _____
12. Maximum pressure drop with clean screen _____
13. Expected cleaning frequency _____
14. Any other information deemed relevant _____

Suggested Specifications

The strainer shall be a basket strainer and have _____ (size) inlet/outlet connections. The end connections shall be (flanged, threaded etc.) and the body shall be complete with a _____ (bolted, quick-opening, etc.) cover assembly. The strainer shall be suitable for _____ PSIG operating pressure at _____ °F operating temperature. The body shall be constructed of _____ (body material) while the screen shall be constructed of _____ (basket or screen material). A mesh lining of _____ (size of mesh) is required, allowing a maximum pressure drop of _____ psig. The strainer shall be equipped with a _____ (gasket material) gasket and the strainer screen shall be able to withstand _____ psig differential pressure without any deformation.

Strainers shall be HART Model # _____ or approved equivalent.

Name _____
Company _____
Address _____
City/Town _____
State _____ Zip Code _____
Telephone (_____) _____
Fax (_____) _____

1.0 Strainer Installation Instructions

- A. Ensure all machined surfaces are free of defects and that the inside of the strainer is free of foreign objects.
- B. For horizontal and vertical pipelines, the strainer should be installed so that the drain connection is pointed downwards.
- C. For flanged end strainers, the flange bolting should be tightened gradually in a back and forth clockwise motion.
- D. Threaded end strainers should use an appropriate sealant.
- E. Once installed, increase line pressure gradually and check for leakage around joints.
- F. If the strainer is supplied with a start-up screen, monitor pressure drop carefully.

2.0 Screen Removal Instructions (Y, Basket, T and Duplex)

- A. Drain piping (For Duplex Strainers, isolate required chamber).
- B. Vent line to relieve pressure.
- C. Loosen cover and open to access screen.
- D. Remove, clean and replace screen in original position (Note: In some instances, a high pressure water jet or steam may be required for effective cleaning)
- E. Inspect cover gasket for damage. If necessary, replace. (Note: If spiral wound gaskets have been used, they must be replaced and can not be used again).
- F. Tighten cover. The strainer is ready for line start-up.

CAUTION SHOULD BE TAKEN DUE TO POSSIBLE EMISSION OF PROCESS MATERIAL FROM PIPING. ALWAYS ENSURE NO LINE PRESSURE EXISTS WHEN OPENING COVER.

3.0 Maintenance Instructions

For maximum efficiency, determine the length of time it takes for the pressure drop to double that in the clean condition. Once the pressure drop reaches an unacceptable value, shut down line and follow the “Basket Removal Instructions” above.

A pressure gauge installed before and after the strainer in-line will indicate pressure loss due to clogging and may be used to determine when cleaning is required.

4.0 Trouble Shooting Guides and Diagnostic Techniques

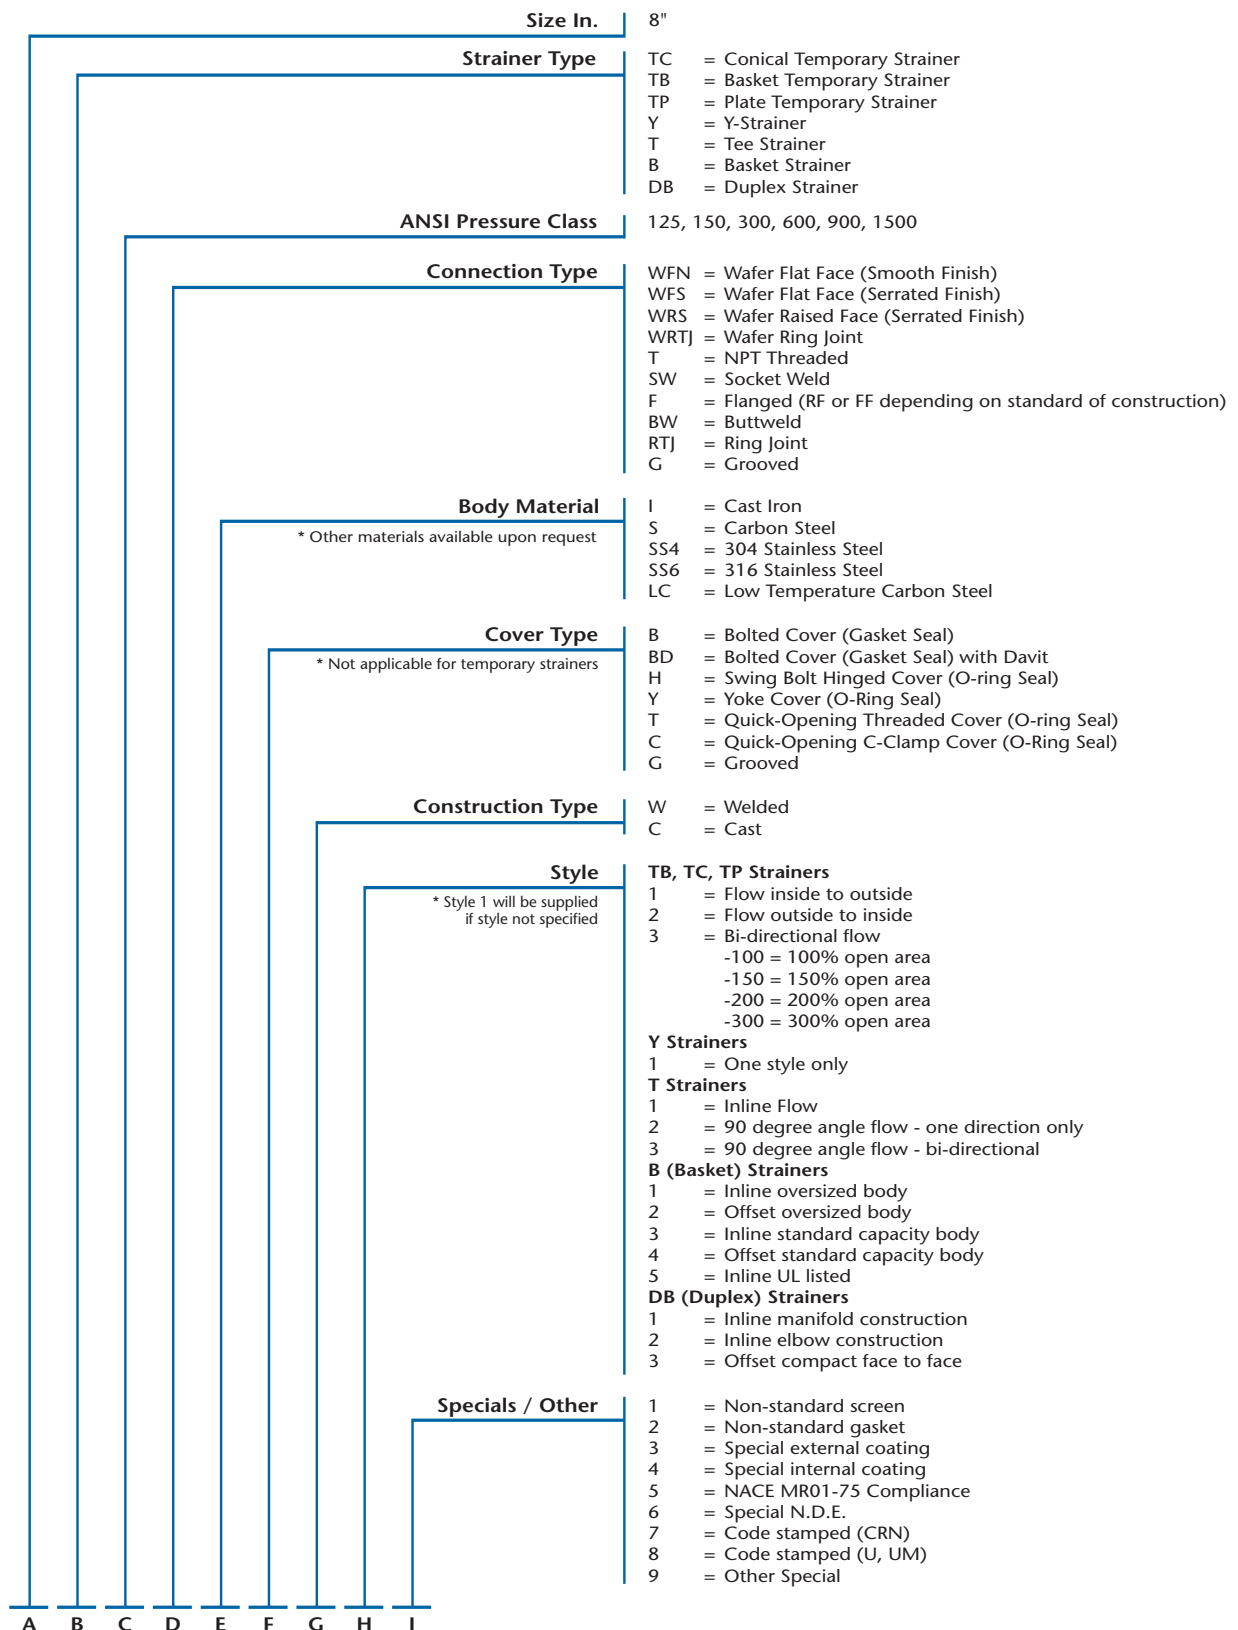

- A. After pressurizing, inspect cover and other joints for leakage. Gasket replacement or cover tightening is necessary if leakage occurs.
- B. If the required filtration is not taking place, ensure the basket is installed in the correct position, that being flush to the basket seating surfaces.

5.0 Limited Warranty

All products are warranted to be free of defects in material and workmanship for a period of one year from the date of shipment, subject to the limitations below: If the purchaser believes a product defective, the purchaser shall:

- A. Notify the manufacturer, state the alleged defect and request permission to return the product.
- B. If permission is given, return the product with transportation prepaid. If the product is accepted for return and found to be defective, the manufacturer will, at its discretion, either repair or replace the product, f.o.b. factory, within 60 days of receipt, or refund the purchase price.

Other than to repair, replace or refund described above, the purchaser agrees that the manufacturer shall not be liable for any losses, costs, expenses or damages of any kind arising out of the product, its use, installation or replacement, labeling, instructions, information or technical data of any kind, description of product use, sample or model, warnings or lack of foregoing. No other warranties, written or oral, expressed or implied, including the warranties of fitness for a particular purpose and merchantability, are made or authorized. No affirmation of fact, promise, description of product use or sample or model shall create any warranty from the manufacturer, unless signed by the president. These products are not manufactured, sold or intended for personal, family or household purposes.
