

WIPE OUT FLUSHABLES & UNCLOG YOUR BUDGET

ARE FLUSHED WIPES, GLOVES, MASKS OR OTHER SOLIDS & DEBRIS CLOGGING THE PUMPS & PIPING IN YOUR COLLECTION OR WASTE TREATMENT SYSTEMS?

Eradicator Solids Management System

Gorman-Rupp's Eradicator System is specifically designed for today's new sewage that contains sanitary wipes, plastic bags, latex gloves, disposable masks, feathers, hair, sludge and other types of debris that lead to clogging and disruption to the sewage pumping system. The Eradicator helps to eliminate nuisance clogging and creates a more efficient flow path that reduces overall life cycle costs. Contact us to retro-fit your existing Gorman-Rupp Super T pump or to discuss an upgrade that includes the Eradicator System.

The innovative design of the Eradicator Solids Management System greatly reduces troublesome clogging and expensive downtime. The Eradicator system features an aggressive self-cleaning wear plate incorporating a number of notches and grooves, as well as a patent-pending lacerating tooth, that helps break up stringy materials and pass them through the pump without impacting performance or interrupting service. A special back cover includes a patented lightweight inspection cover that can easily be removed if it is necessary to inspect the impeller.
